

NO EXCUSE FOR SINGLE-USE

Each year our neonatal unit alone is using 96,000 single use polystyrene mugs. Each polystyrene mug sits in landfill for over 500 years.

We hope to make our neonatal unit more environmentally friendly and help support the future of the babies we care about.

We have collaborated with Ecoffee Cup to design a reusable cup made from sustainable bamboo fibres. Cups are available to purchase from the neonatal unit and all proceeds from will go directly to the SSNAP charity.
